## Bag-Valve-Mask Resuscitators

The “**NEW**” **Easy Grip**® Bag-Valve-Mask Resuscitators are manual resuscitation devices designed for use in various clinical settings to provide respiratory support to the respiratory distressed or non-breathing patient.

The Child and Infant Resuscitators come complete with a pressure Relief Valve set at 40 cm H<sub>2</sub>O, that can be overridden by the operator.

When used as an oxygen supplemental device, these devices can provide up to 100% oxygen on every squeeze and release of the bag.

**NOTE:** An optional pressure relief system is available for the Adult BVM (relief setting 60 cmH<sub>2</sub>O)

**CAUTION:** Federal (U.S.A.) law restricts this device to sale by, or on the order of a physician.

Available in three versions:

**Disposable**  
**Autoclavable Silicone**  
**and Cold Chemical Sterilizable**

and three sizes:

**Adult**  
**Child**  
**Infant**

The **Easy Grip**® range offers the user a complete choice of the size and type of BVM to suit their patient and institutional needs.

### WARNINGS:

**Easy Grip**® Bag-Valve-Mask Resuscitators should only be used by trained personnel familiar with Cardio-Pulmonary Resuscitation. Use only as directed. Improper usage or unauthorized modification of this product may result in user or patient injury.

**Easy Grip**® Disposable Bag-Valve-Mask Resuscitators are designed for single patient use only. They must not be cleaned and re-used.
